

## Can you spare 5 minutes to help control these pests?

We are working with the Department of Primary Industries and Regional Development's (DPIRD) Invasive Species Program to better understand the issues currently being faced by landholders regarding wild rabbits and feral pigs. **We would like to hear about your methods for controlling them, and what could make this process easier.** We have extended the deadline for completion of the survey to the **30<sup>th</sup> of May**.

We would like you to complete the online questionnaire about the control of wild rabbits and/or feral pigs on your property. The survey can be found at <https://www.surveymonkey.com/r/BRMPRV3> and will only take 5 minutes to complete. You have until the 30<sup>th</sup> of May to complete it and, once the survey has concluded, a summary of the results will be published on DPIRD's website at the middle of June.

The findings from the survey will be used to identify areas where wild rabbits and feral pigs are an issue and prioritise activities that will assist landholders to better manage these pests.
